

Name _____

Class _____

Date _____

Immigration to the United States

Think about your own family's history of immigration.

1. If you have ancestors who are not Native Americans, where did they come from and when did they arrive in the United States?
2. What hardships or challenges do you think they faced as immigrants?
3. What do you know about how people immigrate to the United States today?
4. What do you think a family would need after arriving in the United States for the first time?
